Bala Nekkanti

Full Stack Engineer @USAA - Execution Excellence | Collaborative
Teamwork | Sustained Personal Development
Broomfield, Colorado, United States

Summary

I hold a profound passion for exploring complex challenges and
using cutting-edge web technologies to overcome them. My
approach to work is characterized by an unwavering commitment.

Over the course of my career, I've undertaken various roles at
diverse companies, each presenting a distinct set of responsibilities.
These positions have spanned from maintaining corporate websites
to contributing to the development of in-house projects. Not only
have I found immense satisfaction in each role, but I've consistently
excelled in them.

My professional value can be encapsulated in the following core
areas:

Execution Excellence: I possess the capability to excel in any task
entrusted to me, consistently delivering exceptional outcomes.
This proficiency is rooted in my profound grasp of programming
fundamentals, outstanding troubleshooting and debugging skills,
and my unwavering commitment to leveraging my knowledge and
experience to execute tasks with a strong sense of responsibility.

Team Collaboration: I am a valuable asset to any team. I willingly
share my knowledge with fellow team members, facilitate the
onboarding of new colleagues, and actively engage in collaborative
efforts with my peers, making me highly approachable to all my
coworkers.

Continuous Self-Improvement: I am dedicated to my personal
growth. I thrive on tackling challenging and intricate tasks, pushing
my own boundaries, and maintaining an insatiable curiosity about
emerging industry trends and technologies. This drive has led me
to achieve MVP status in numerous sprints. I actively seek out and

value the knowledge and experience of others to continually refine and enhance my skill set.

Currently, my skill set includes a robust foundation in:
HTML | CSS | JavaScript | jQuery | Git | XML | JSON | NodeJS | Java | MongoDB | MYSQL

I am presently in the process of acquiring proficiency in:
Python | Agentic AI

While I have achieved significant milestones, I remain acutely aware that an ongoing journey of learning, problem-solving, and personal growth stretches infinitely ahead.

Experience

USAA
Full Stack Engineer
April 2022 - November 2024 (2 years 8 months)
Broomfield, Colorado, United States

USAA provides Insurance, Banking, Investing and advice for U.S. Military members, veterans and their families. Worked under team Warriors, responsibilities include making sure members have continued access to their credit card, debit card and consumer loan account information online, fraud prevention and spending habit notifications, have high availability and cannot have extended downtime which includes 24/7 on-call support ensuring the uninterrupted operation of critical systems and rapid issue resolution. Support releases of updates and fixes to bugs in current web and mobile applications. We have millions of users accessing the website to keep them informed about their finances.

Dialekt LLC
Software Developer
July 2021 - April 2022 (10 months)
Denver, Colorado, United States

Worked on Boredom Fighters Project, it is a nonprofit organization whose mission is to bring music studios and instruments to underserved communities nationwide. They planned to build an animated series that walks viewers through setting up the studio, producing their own musing, and creating an

artist brand to release music online. Were we are helping them with building online courses

Also worked on Kampfire mobile app which is a free digital publishing app for creative writers, poets, songwriters, and visual artists. This is a not-for-profit application started with the idea to provide a platform for kids in foster care to express their creative selves.
